Reasons for allowance

1. Claims 1-4, 6-12 and 14-20 are allowed and renumbered as claims 1-18.
2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest the recited article further including a second component overlapping a first component, where the first component has a volume expansion between T_o (onset of melting temperature) and T_p (peak melting temperature) which is greater than the volume expansion of the second composition over the same temperature range, and the first and second components have dimensions and shapes such that the article, in the absence of external restraint, changes shape when it is heated from T_o to T_p and when it is cooled from T_p to T_o .

The prior art of record also does not teach or suggest the recited fibrous mass further including a second component overlapping a first component, where the first polymeric composition having a volume expansion between T_o (onset of melting temperature) and T_p (peak melting temperature) which is five times the volume expansion of the second composition over the same temperature range, and the first and second components having dimensions and shapes such that the fibrous mass, in the absence of external restraint, changes shape when it is heated from T_o to T_p and when it is cooled from T_p to T_o .

The prior art does not teach motivation or suggestion for modification to make the invention as instantly claimed.
